SELF-DIAGNOSIS FUNCTION

The self-diagnosis function consists of error codes for customers which are displayed automatically when errors occur, and error codes which show the error history in the test mode during servicing. For details on how to view error codes for the customer, refer to the following box in the instruction manual. For details on how to check error codes during servicing, refer to the following "Procedure for using the Self-Diagnosis Function (Error History Display Mode)".

Self-Diagnosis Function

The self-diagnosis function consists of error codes for customers which are displayed automatically when errors occur, and error codes which show the error history in the test mode during servicing. For details on how to view error codes for the customer, refer to the following box in the instruction manual. For details on how to check error codes during servicing, refer to the following "Procedure for using the Self-Diagnosis Function (Error History Display Mode)".

08	Disc tray door is closed.
09	Disc tray door is open.
10	Disc tray door is closed.

Procedure for using the Self-Diagnosis Function (Error History Display Mode)

Note: Perform the self-diagnosis function in the "test mode" in the test mode. The following describes the least required procedure. Be careful not to enter other modes by mistake. If you set other modes accidentally, press the **MINUS** button to exit the mode.

As this unit uses two mechanisms Deck A and Deck B, it carries out self-diagnosis for each deck. For buttons or knobs not specified as (Deck A) or (Deck B) in the procedure, use that of the corresponding deck.

- With the power ON, press the **4** (Deck B) button while pressing the **PAUSE** and **CLEAR (DECK A)** buttons together.
- Rotate the **AMS** knob and when "Service" is displayed, press the **YES** button.
- Rotate the **AMS** knob and display "ERR DP MODE".
- Pressing the **YES** button sets the error history mode and displays "total rec".
- Select the contents to be displayed or executed using the **AMS** knob.
- Pressing the **AMS** knob will display or execute the contents selected.
- Pressing the **AMS** knob another time returns to step 4.
- Pressing the **MINUS** button displays "ERROR DP MODE" and exits the error history mode.
- To exit the test mode, press the **MINUS** button. The unit sets into the STANDBY state, and the test mode ends.
